## SKILLS

### Programming

Python, JavaScript, TypeScript

### Web

React, DeckGL, HTML, CSS, JS, NodeJS, TS

### Database

SQL, MongoDB, ArangoDB

### Virtualization

Docker, Kubernetes, GCP, Google Cloud Functions

## EDUCATION

### Rouen University

Master in Management and Business Administration (Double competence)  
Sept 2019 – June 2020

### Télécom Sud-Paris

Erasmus - High Tech Imaging  
Sept 2018 – June 2019

### National Institute of Posts and Telecommunications

Engineering degree in IT  
Sept 2016 – June 2019

## PROFILE

Front-End Developer with Full-Stack Experience, building modern web applications with React, Node.js, and TypeScript. I care about writing maintainable code, building intuitive UIs, and understanding the product behind the code. Always looking for better ways to build web experiences that feel smooth, reliable, and enjoyable to use.

## WORK EXPERIENCE

### Freelance

Full stack developer · May 2025 – Present

- Design and build full-stack web apps for clients from brief to production.
- Implement React/TypeScript frontends with component libraries and responsive design.
- Develop Node.js APIs and integrations (REST/GraphQL); automate testing and CI/CD.
- Build interactive maps and dashboards with data visualization libraries.

### Geotwin | CDI

Front end web developer · August 2021 – January 2024

- Development and deployment of Geotwin static website.
- Built and maintained the Geotwin Platform front end using React, Mapbox, and DeckGL for interactive data visualization.
- Integrated complex datasets via REST APIs and implemented UI designs from Figma and Zeplin.
- Developed end-to-end tests to ensure performance and reliability.
